Armenia's revised proposal targets poverty reduction through increased agricultural productivity, output and commercialization.

### Armenia's current proposal for MCA Assistance

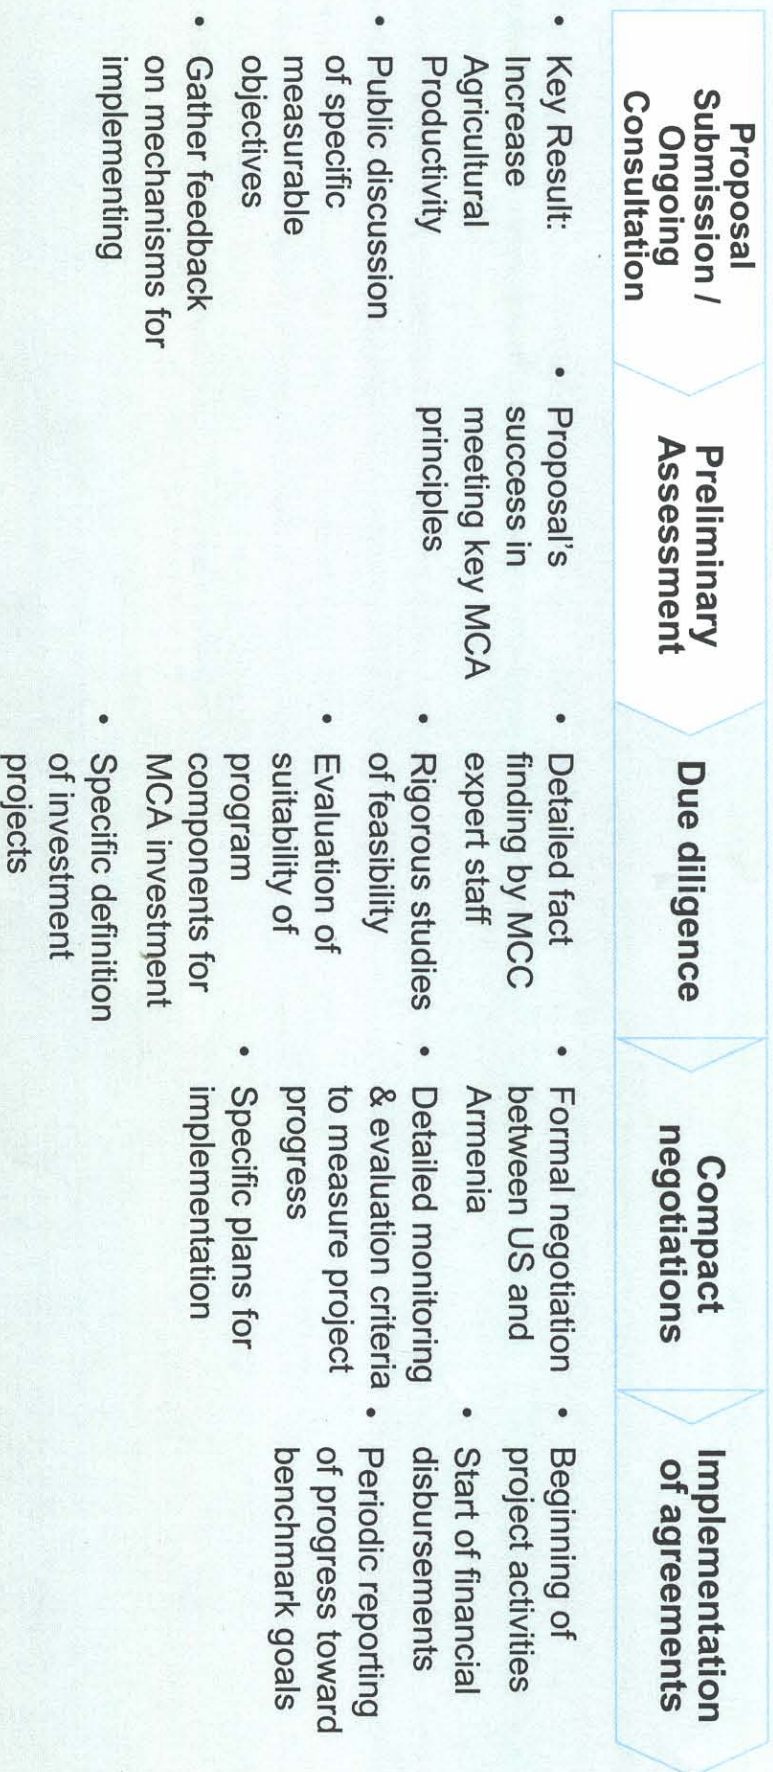

### Proposal Components

- Irrigation development component designed to increase agricultural output and productivity
- Rural Roads development component seeks to provide rural farms and communities improved access to market places, community centers and governmental services
- Technical Assistance component aims to provide resources, knowledge, and implementation tools to the State Water Supply Agency and Water User Associations

The revised Proposal totals \$175.00 million

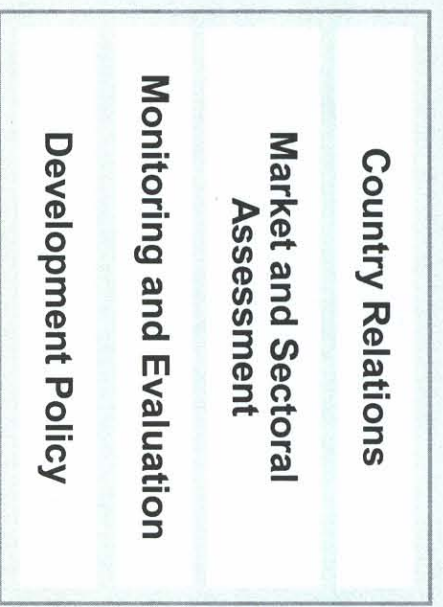

# Next steps involve further revision and consultation prior to the beginning of MCC's due diligence
